Following along the course

Hello!

Thank you so much for taking the time to follow along this course. This document will help you get started with the exercise files, so that you easily can follow along the demonstrations in the course.

The exercise files both contains a "Start_Here" and a "Completed" folder, where you can start following along the code in "Start_Here", and if you get stuck you can always copy the code over from the folder "Completed".

If you have any questions, please ask those questions in the discussion tab on the course page at www.pluralsight.com.

Thank you for watching!

Filip Ekberg

Running the Demos

Data provided for free by IEX View IEX's Terms of Use.

- Open the solution in your favorite IDE, I use Rider on Linux
- Clean & Rebuild the solution
- Compile and Run both the Web and Linux Applications
